Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

| | | | |
|------------------------------|--------------------------------------|---|--|
| Office Action Summary | Application No. 10/615,576 | Applicant(s) KINGSMORE ET AL. | |
| | Examiner CON P. TRAN | Art Unit 2615 | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 March 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 23 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Claim 23 recites "a chassis, a microprocessor mounted in the chassis, a storage coupled to the microprocessor" and the information for the limitations could not be found in the specification. This important information must be disclosed and included in the drawings to allow one of ordinary skill make or use the claimed invention.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2615

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-23** are rejected under 35 U.S.C. 103(a) as being unpatentable over Howell et al. U.S. Patent 5,825,616 (hereinafter, "Howell") in view of Viletto U.S. Patent 5,475,626

Regarding **claim 11**, Howell teaches battery (including extra battery pack, col. 1, lines 58-59) operable to provide power to a portable device of an information handling system (portable computers, col. 1, lines 49-50), the battery comprising:

a battery (i.e., including extra battery pack, col. 1, lines 58-59) housed in a battery housing (i.e., in the portable computer housing since "a battery" including a standard battery and an extra battery pack which is media module 101, Fig. 2 when extra battery pack being held in media bay as media module 101, Fig. 2, col. 3, lines 22-46) wherein the battery is removable to define a selective portion (which is the entire portion of the extra battery pack) of the battery housing (the media bay flexibly holds one or more removable electronic devices or media modules such as a set of speakers, or extra battery pack; see col. 1, lines 49-62, also see media module 101, Fig. 2, col. 3, lines 22-46; i.e., remove battery "module"); and

a speaker assembly (i.e., set of speaker, col. 1, lines 58-59) housed in a speaker container (i.e., in speaker "module" col. 1, lines 56-62), wherein the speaker container (i.e., in media module) is installable in the selective portion, wherein

Art Unit: 2615

dimensions of the battery housing (i.e., dimensions of the portable computer housing) having the speaker container installed in the selective portion (at media bay 201, Fig. 2) are substantially unchanged since media bay holds one or more media modules, e.g., battery and speaker; the battery is replaced by the speaker assembly in the media bay; see col. 1, lines 49-62).

Howell does not explicitly disclose the battery comprising a plurality of cells. Viletto discloses a portable computer in which the battery pack (87, Figs. 1, 4, 6, 10) including batteries cells (88, Figs. 1, 4, 6, 10; col. 4, lines 26-32).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the battery pack taught by Viletto with the battery of Howell such that the battery comprising a plurality of cells as claimed for purpose of being powered reliably using a pack of rechargeable batteries, as suggested by Viletto in column 1, lines 31-33.

Regarding **claim 12**, Howell in view of Viletto teaches the battery of claim 11. Viletto, as modified further teaches comprising: a terminal connector assembly having a plurality of electrical connectors, wherein the battery is electrically coupled to a first portion of the plurality of the electrical connectors for providing the power (converter 91, Fig. 3), wherein the speaker assembly is electrically coupled to a second portion of the plurality of the electrical connectors for receiving an audio output signal generated by the device (terminal of speaker 104, Fig. 3), and wherein the first portion and the second portion are electrically isolated (see Fig. 3).

Regarding **claim 13**, Howell in view of Viletto teaches the battery of claim 11. Howell in view of Viletto, as modified, further teaches wherein the speaker assembly being capable of including a speaker operable to output sound having a frequency range from about 20 Hertz to about 120 Hertz (set of speakers, see Howell col. 1, lines 54-62).

Regarding **claim 14**, Howell in view of Viletto teaches the battery of claim 13. Viletto, as modified, further teaches wherein an audio card (including 107, 101, Fig. 3) of the portable device is electrically coupled to the speaker (see col. 4, lines 6-16).

Regarding **claim 15**, Howell in view of Viletto teaches the battery of claim 13. Howell in view of Viletto, as modified, further teaches wherein the speaker container substantially matches a form factor of the selective portion, wherein a base of the speaker container includes an opening, the opening substantially matching dimensions of the speaker (modules, see Howell col. 4, lines 6-16; see also Viletto col. 10, lines 17-22, e.g., space optimization, be able to accommodate).

Regarding **claim 16**, Howell in view of Viletto teaches the battery of claim 13. Howell in view of Viletto, as modified, further teaches wherein a volume of the speaker container is sufficient to produce the output sound having the frequency range from about 20 Hertz to about 120 Hertz (i.e., capable of powering the electronic unit 34 via a

Art Unit: 2615

power supply control circuit 89 in order to power the various functions of the computer 31, see Viletto, col. 3, lines 35-38).

Regarding **claim 17**, Howell in view of Viletto teaches the battery of claim 11. Howell in view of Viletto, as modified, further teaches wherein the battery housing and the speaker container comprises a plastic material (see Viletto, col. 5, lines 8-10).

Regarding **claim 18**, Howell in view of Viletto teaches the battery of claim 11. Howell in view of Viletto, as modified, further teaches wherein the installation of the speaker assembly in the portable device does not affect other components included in the portable device except for the predefined number of cells (since it is a module, see Howell, col. 1, lines 53-62; item 101, Fig. 2. It is noted that extra battery pack in the media bay is a portion of "a battery" in which a standard battery is another portion.)

Regarding **claim 19**, Howell in view of Viletto teaches the battery of claim 11. Howell in view of Viletto, as modified, further teaches wherein the installation of the speaker assembly in the portable device does not affect an overall size of the portable device (since it is a module, see Howell, col. 1, lines 53-62; item 101, Fig. 2).

Regarding **claim 20**, Howell in view of Viletto teaches the battery of claim 11. Howell in view of Viletto, as modified, further teaches wherein the portable device is

Art Unit: 2615

defined to include the speaker assembly as an option (flexibly holds one or more removable electronic devices or media modules, see Howell, col. 1, lines 53-62; item 101, Fig. 2; see also Viletto, col. 7, lines 36-40).

Regarding **claims 1-10**, these claims merely reflect the method to the apparatus claim of claims 11-20 and are therefore rejected for the same reasons.

Regarding **claim 21**, Claim 21 is also met in view of claim 1 since Claim 21 is an application of Claim 1 in an information handling system. In addition, Howell in view of Viletto disclose an information handling system (see Howell, portable computers 110, Fig. 1; col. 1, lines 49-50) comprising:

- a processor (see Howell, col. 12, lines 5-6);

- a system bus (see Howell, system board electrical connector 214, Fig. 2; col. 3, lines 61-64);

- a memory coupled to the processor through the system bus (see Howell, col. 1, lines 16-26);

- an audio card coupled to the processor and the memory through the system bus (see Viletto, including 107, 101, Fig. 3 col. 4, lines 6-16);

- a battery system (see Viletto, battery pack 87 Fig. 3) operable to provide power to the processor, the bus and the memory (see Viletto, col. 3, lines 8-16), the battery being connectable to an AC adapter for deriving power from an AC power

source (see Viletto, external power unit 93, Figs. 3, 4; charging battery, col. 3, lines 50-52).

Regarding **claim 22**, this claim has similar limitations as Claim 6. Therefore it is interpreted and rejected under Howell in view of Viletto for the reasons set forth in the rejection of Claim 6.

Regarding **claim 23**, this claim has similar limitations as Claim 21. Therefore it is interpreted and rejected under Howell in view of Viletto for the reasons set forth in the rejection of Claim 21. It is noted that Howell in view of Viletto discloses microprocessor (61, Fig. 3) obviously mounted in a chassis (common earth, col. 4, lines 33-38), and coupled to storage (DRAM 62, Fig. 3).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Con P. Tran whose telephone number is (571) 272-7532. The examiner can normally be reached on M - F (8:30 AM - 5:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Vivian C. Chin can be reached on (571) 272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
